EXPERIENCE

Trilogy Active, Northampton – *Lifeguard* October 2023 – Present

- Upholding the standards and safety of Trilogy Active
- Liaising with customers & ensuring their well-being

KP Studios, Brixworth – Software *developer* June 2024 – September 2025

- Developed a suite of Ruby on Rails web applications aligned with the Greenhouse Gas Protocol to track and analyse carbon emissions across construction projects throughout the entire lifecycle
- Built a Ruby on Rails API integrated with Shopify web-hooks to collect and process real-time order data
- Designed and managed a PostgreSQL database for efficient storage and querying of data
- Implemented interactive dashboards with JavaScript, jQuery, and Chart.js to visualize KPIs
- Delivered custom solutions for complex e-commerce platforms and client websites
- Maintained production servers to ensure reliability and performance

Fablink Cab Systems, Brixworth - *Development Engineer* August 2021 – May 2024

- Supporting customer requirements for complex production line welding assemblies
- Producing components via manual machining to customer stated tolerances
- Maintaining functionality of production line welding assemblies

Web Alliance LTD, Northampton - *Software Engineer*

June 2021 - June 2021 (Work Experience)

- Developing tools using Python's requests library to gather and parse public company data

EDUCATION

JBC Skills Training, Online

August 2024 – November 2025

Level 3 – IT Solutions Technician (Merit)

Abbeyfield School, Mereway

September 2019 - August 2021

GCSEs: Computer Science (7), Mathematics (6), Biology (6), Chemistry (6), Physics (6), English Literature (5), English Language (5), Art & Design (5)

PROJECTS

NZC Suite

Worked across multiple modules (Plus, Plus Lite, Professional, Market Place, Hub, and Live) within a carbon reporting platform supporting the UK construction industry's transition to net zero.

- Designed, built, and maintained databases across multiple core modules within the suite, ensuring data integrity and scalability
- Collaborated with stakeholders to translate customer feedback into practical software improvements
- Supported early development through to user acceptance testing across multiple products
- Developed responsive and mobile friendly web interfaces aligned with Figma designs
- Processed and displayed real-time data streams, into actionable user insights
- Implemented and maintained automated customer mailing systems

Natural Doctors Solutions

E-commerce gut health testing platform integrated with Shopify webhooks.

- Designed and implemented a real-time order processing pipeline using a Ruby on Rails API, enabling automated handling of customer test kit purchases
- Engineered backend logic to generate unique user activation codes per order, ensuring secure mapping between physical test kits and digital user accounts
- Developed a seamless onboarding flow using Shopify, Liquid and React allowing customers to enter user data and activate their kits directly within the storefront
- Implemented an automated mailing system to trigger customer communications (order confirmations, activation instructions, and status updates), improving user onboarding and reducing manual support workload

BeeBrix

Developed and supported an internal office administration and HR platform to manage users and organisational processes.

- Maintained the reliability of mailing systems and other core systems throughout the site
- Diagnosed and resolved support tickets efficiently, improving system reliability
- Managed user roles and permissions to ensure secure access control

SKILLS

Ruby On Rails, JavaScript, Engineering, PHP, SQL, CSS, Heroku, Hatch box, Shopify, jQuery, Liquid, Linux, Manual Machining (Lathe, Mill, Pillar drill), Fabrication (Mig welding, Hand fitting, Machining), First Aid, Database design, Responsive web development, API/Data handling, Mail automation, ISO 14064, Figma implementation, User access control, Debugging & Support, System maintenance, Mail systems
